

## Self-image

We have formulated a self-image which summarizes the values and goals for our co-living project. This self-image is the foundation for our living together and shall be a guideline for our decisions.

- Living in solidarity and community

We want to care for and support each other in different aspects of life. We want to share and take part in the form of common spaces, shared care-work and other support, collective activities and projects.

- We want to participate in the life of the village community of Schwabenheim, create spaces for encounters and promote cultural diversity.
- Self-governed living in a community

The real estate of the project is unsellable and self-governed, the rents are self-determined.

- Living spaces should be permanently affordable. No profit via rents, a personal gain of individuals is made impossible with our project structure.
- Tailored to current needs, efficient and flexible use of living spaces
- Our daily contact and our decision finding process is shaped by an equality and consensus based discussion culture.
- Self-governance is work. We want to share this work by rotating responsibilities and knowledge transfer such that the project stays sustainable and ready for the future.
- We strive for ecological sustainability by preserving existing assets, using sustainable materials for the new building as well as regenerative energies.
- We condemn inhuman ideologies and strive for a respectful contact with each other and we view diversity as an asset.
- Common mobility concept (Bike- and Car- Sharing).
- We want to become part of the 'Mietshäusersyndikat'.
